

Virtual Internal Medicine Opportunity Obesity & Women's Health | British Columbia

About Us

Metabolite Clinic is a virtual clinic serving British Columbia, offering MSP-covered, specialist-led obesity and menopause care, with additional support from dietitians and psychotherapists.

Position Overview

We are seeking an **Internal Medicine Specialist** with an interest in **obesity medicine and menopause care, including hormone replacement therapy (HRT)**, to join our team. This role offers flexible **part-time or full-time** opportunities, with all patient consultations and follow-up visits conducted virtually.

Responsibilities

- Develop and manage personalized treatment plans, including prescribing anti-obesity medications and hormone replacement therapy when appropriate
- Collaborate with a multidisciplinary team, including dietitians and psychotherapists, to provide holistic, evidence-based care
- Conduct virtual consultations and follow-up visits in a professional, patient-centered manner
- **Training in women's health (HRT), including video modules can be provided if needed**

Qualifications

- Licensed to practice in British Columbia in **Internal Medicine, Endocrinology, Nephrology, Respiriology or Gastroenterology**
- Interest in obesity medicine and women's health
- New graduates are welcome to apply
- Comfortable using virtual care platforms and technology

Benefits

- MSP-Fee-for-service billing
- Flexible work hours and days (part time or full time)
- Fully virtual role with the ability to work from home
- Billings on average range from \$2,500-\$4,000 per shift
