Established General Internal Medicine Practice Looking to Add new Internist

Revive Lifestyle Medicine is a General Internal Medicine practice located in Victoria British Columbia currently consisting of 2 GIM specialists. Our practice is expanding and we are eager to add one or two more like-minded Internists to our growing group practice.

Revive is a broad GIM practice with an in-house cardiac electrodiagnostics suite (treadmill, Holters, ECG). Our clinic sees a broad array of Internal Medicine cases and uses the latest in practice management techniques to deliver highly efficient, quality patient care.

As our name implies, we focus heavily on lifestyle modification in treating chronic internal medicine diseases and have allied health professionals employed in the practice to assist in this. Outside of this focus, our practice is a very typical, broad based specialty practice, ranging from preoperative consultation to wide array of diagnostic/consultative internal medicine to chronic complex disease management to non-procedural cardiology and beyond.

Opportunities exist to participate in the hospital-based group's call rota as a locum (there is an ongoing need) and can be pursued concurrently if the successful General Internist(s) wish(es).

This is a high billing Medical Services Plan BC (fee for service provincial medicare funded) practice with no formal on-call obligations. If you are interested in moving to one of the most highly rated cities on Earth and enjoying a rewarding career without any obligatory hospital call, please contact us today!
